

Conformity declaration of bicycle components

We hereby confirm that Grip Smile Safety 101C comply with “EN 8098 -Safety requirements for bicycles for young children” relevant points “4.2 Toxicity” and “4.8 Steering”.

Please note that removal force is depending on the diameter, type of surface and conditions of the handlebar.

The toxicity statement is based on results from external laboratory. Every new raw material is tested before approval and production samples are randomly tested approximately once per year.
